Portfolio: portfolio-s7w6.vercel.app

Data Analyst with hands-on experience in SQL, Python, Power BI, and Advanced Excel, specializing in transforming raw data into actionable business insights. Experienced in building KPI dashboards, performing exploratory data analysis, and developing end-to-end analytics solutions across real-world datasets. Proven ability to automate reporting, identify trends, and support data-driven decision-making through analytical and problem-solving skills.

TECHNICAL SKILLS

- | | | | |
|-----------------|----------------------|-------------------------|-----------------------------------|
| • SQL | • Advanced Excel | • Power BI | • Tableau |
| • Python | • Data Visualization | • Dashboard Development | • KPI Reporting |
| • Power Query | • DAX | • Data Cleaning | • Exploratory Data Analysis (EDA) |
| • Pandas | • NumPy | • Forecasting | • Data Modeling |
| • ETL Workflows | • Business Analytics | • MySQL | • PostgreSQL |
| • Git | • Streamlit | • Jupyter Notebook | • VS Code |

PROFESSIONAL EXPERIENCE

Data Analyst Intern | KaroStartup

Feb 2026 – Jun 2026

- Analyzed business and procurement datasets using SQL, Python, and Advanced Excel, identifying key trends and improving data-driven decision-making efficiency.
- Developed interactive dashboards and automated reporting workflows, reducing manual report.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to ensure high data quality and reliability across analytics tasks.
- Contributed to AI-assisted analytics solutions by generating insights and supporting data-driven reporting initiatives.

PROJECTS

NexusIQ Enterprise – AI-Powered Business Intelligence Platform | Python, SQL, Pandas, Streamlit

- Built an AI-driven BI platform that converts raw CSV/Excel data into interactive dashboards, KPI analysis, and automated insights.
- Developed data pipelines using Python (Pandas) and SQL to generate business metrics and structured analytics outputs.
- Integrated AI modules for dataset profiling, anomaly detection, and automated executive summaries for faster decision-making.

Global Production & Consumption Analytics | SQL, Power BI

- Analyzed global production and consumption datasets to identify demand trends, regional performance, and supply patterns.
- Designed Power BI dashboards to track KPIs such as production volume, consumption rate, and country-wise distribution.
- Transformed complex datasets into clear visual insights, improving business understanding and analytical decision-making.

Customer Churn Analysis System | PostgreSQL

- Built a churn analysis system using PostgreSQL with **10,000+ records** to study customer behavior and retention patterns.
- Performed advanced SQL analysis using CTEs, window functions, CASE statements, and aggregations to identify high-risk segments.
- Generated actionable insights including churn rate, segmentation, and retention indicators using reusable SQL views.

EDUCATION

Master of Computer Applications (MCA)

Dayananda Sagar College of Engineering

Aug 2024 – Jun 2026

CGPA: **9.14**

Bachelor of Computer Applications (BCA)

Christ College of Science and Management

Nov 2021 – Aug 2024

CGPA: **9.03**
